Appointments available: 7 a.m. — 7 p.m.

Who should get a prostate exam?

One in six men will get prostate cancer, but if caught early, nearly 100 percent survive. Early prostate cancer has no symptoms, that's why screening is so important.

All healthy men age 40 and older should be screened. Men with a family history of cancer and African-American men age 35 and older should also be screened. Schedule today!

Heartland Health
